- Activity Name** : Short Term Training Programme for Officers of Central Pollution Control Board
- Activity scope** : To aware on environment pollution & importance of alcohol production
- Activity details** : Short term training programme on 'Pollution control and waste management in distillery units' for officers from Central Pollution Control Board (CPCB), New Delhi was organized at VSI by Department of Alcohol Technology & Biofuels (AT&B), VSI in two batches. The 1st batch training session was conducted during April 19 - 21, 2023 (6 Officers) and 2nd batch during June 26 to 28, 2023 (9 Officers). Both the short term courses covered topics such as Alcohol Production: World Scenario & Trends, Alcohol production from various feedstock, Distillery effluent treatment norms and present status, Trends, Technical challenges & solutions in distillery zero liquid discharge technologies. Students were also attended the programme & benefited.

Short Term Training Programme for Officers of Central Pollution Control Board

A short term training programme on 'Pollution control and waste management in distillery units' for officers from Central Pollution Control Board (CPCB), New Delhi was organized at VSI by Department of Alcohol Technology & Biofuels (AT& B), VSI in two batches. The 1st batch training session was conducted during April 19 - 21, 2023 (6 Officers) and 2nd batch during June 26 to 28, 2023 (9 Officers).

The training programmes were inaugurated by Mr. Sambhaji Kadupatil, DG, VSI. Dr. KS Konde, Head, Professor & Technical Adviser, Department of AT & B. Dr. KS Konde elaborated the activities of Department and thanked the CPCB for sending the officers for the training programme at VSI.

Both the short term courses covered topics such as Alcohol Production: World Scenario & Trends, Alcohol production from various feedstock, Distillery effluent treatment norms and present status, Trends, Technical challenges & solutions in distillery zero liquid discharge technologies (Biocmposting, incineration, dryer and CSIR-CSMCRI), Pollution profile and

by-product recovery (CO₂), Polishing treatment for process condensate and low strength effluent generated in distilleries, Best practices for reduction in fresh water consumption and spentwash generation, Concept of Captive Power Plant: Mode of turbine operation w. r. t. Power generation, water consumption and losses in cooling tower, Evaporation technologies for concentrating distillery spentwash, CIP of evaporator in distillery and fate of generated waste, Operation and maintenance of cooling towers, Water and mass balance in distillery unit (molasses and grain based), Advance technologies in distillery (Potash recovery and granulation technology from spentwash powder, Air cooled condenser & MVR) etc.

The visit to Shree Ambalika Sugar Pvt. Ltd of participants was arranged for understanding the effluent treatment system implemented in distillery industry. The officers were impressed by visiting the distillery and ETP.

On the occasion of the concluding session the certificates were distributed to the officers by DG, VSI. The participated officers appreciated the overall training programme organized by VSI.

National Technology Day

Technology thrives in every area right from agriculture and healthcare to application and food services. National Technology Day is celebrated on **May 11** every year to commemorate the achievements of scientists, researchers, engineers and all others involved in the field of science and technology. At VSI, we have celebrated this special day by organizing a lecture of an eminent scientist or researcher on a subject of interest every year. The subjects have ranged from applications of biotechnology to nanotechnology, technology transfer, supercomputing, intellectual property rights etc. The Technology Development Board of the Ministry of Science & Technology declared this year's theme as "School to Startups-Igniting Young Minds to Innovate". In keeping with the theme, VSI invited Dr. Rajendra Shende, Founder Director, Green Terre Foundation and former Director, United Nations Environment Program, Paris who has worked on the global stage and is now working for inspiring the youth through the 'Smart Cloud Campus Network'. Mr. Sambhaji KaduPatil, Director General (DG), VSI, presided over the program.

The function began with the lighting of the lamp by Dr. Shende, the Director General and others. Dr. Deepali Nimbalkar introduced the speaker. She mentioned that he is an international expert on Sustainable Development, Green Economy, Climate Change, Energy, Ozone Layer Protection and Food

security. He was Coordinating Lead Author of Inter-governmental Panel on Climate Change (IPCC) that shared Nobel Peace Prize in 2007 with Al Gore. After the introduction, the Director General felicitated Dr. Shende and addressed the audience. He explained the background of the National Technology Day and the 3 events that happened on May 11, 1998 which laid the foundation for this day being declared as national celebration.

Dr. Shende delivered a talk on 'Technology 1.0 To 5.0: Did we forget Technology 0.0?' He initiated his talk by explaining about the development of technology from 1.0 to 5.0 and how the pace of technological development has grown exponentially. He cautioned about the dangers of artificial intelligence as a part of technology 5.0 and said that nature was much more advanced than most of the technological developments made by man. Infact, many technological developments have been inspired by nature. He gave examples of the dung beetles accurate movements and carrying load many times more than its body weight, perfect ventilation in huge termite nests/ant holes etc. which were inspiring development of today. He also explained part of his work on solar energy and development of solar vaccine cooler.

His talk was very well received by the staff and students of VSI. The function ended with vote of thanks by Dr. Preeti Deshmukh.

Visit of Fiji Sugar Corporation, Fiji

The delegates of technical experts as Mr. Vinod Prasad (Process), Mr. Anberson (Mechanical) and Mr. Shiu (Procurement) from Fiji Sugar Corporation, Fiji visited VSI on June, 8-9, 2023. Mr. Sambhaji Kadupatil, DG welcomed the delegates in presence of Mr. Shivajirao Deshmukh, Adviser, and other members of technical division. During their visit they discussed regarding new green filed sugar project along with Cogeneration, Distillery project and Ethanol project to be established by Fiji Sugar Corporation, Fiji Islands. Fiji Sugar Corporation needs help from Vasantdada Sugar Institute for technical

assistance and guidance for selection of promising and non-exploiting plant & machinery supplier for their upcoming projects. They also visited to Daund Sugar Pvt. Ltd. to see the modern sugar plant with cogeneration, distillery (ethanol) plant. They also visit to Thyssenkrupp Industries (TKII) and Ulka Industries - the plant and machinery manufacturers in Pune. The delegates visited Sugar Engineering Department, Alcohol & Biofuels Department and Sugar Technology Department and discussed relevant advanced technologies related to sugar and allied industry.

Short Term Training Programme – June 2023

VSI has conducting various short term training programmes for the employees of the sugar mills working in different sections every year. These training programmes are related in the field of Sugar Engineering, Sugar Technology, Alcohol Technology & Biofuels, Environmental Sciences and Instrumentation. The main objective of these training programmes is to enhance working knowledge, vision to adopt new technology of the employees working in the Sugar mills. The participants of sugar mills are acquired knowledge of new developments that is useful for

improving technical efficiency of sugar mills and allied industries. The genuine effectiveness and practical utility of these courses have been widely accepted and adopted by the sugar industries. Many industries treat this training course as some essential criteria for granting promotion to higher grade for the employees. The short term courses were conducted during June 19-30, 2023. The details of the training programme and number of participants are given below;

Programme	No. of Participants
Juice Clarification & Evaporation	59
Pan Boiling & Centrifugal	80
DFPD Guidelines for various feed stocks various feed stocks diversion for ethanol production & FRP Recovery Calculation	81
Boiler attendant	30
Mill foreman	38
Fermentation & Distillation techniques in distillery	50
Techniques in Analytical Instruments	06
Repairs and Maintenance of sugar factory instruments	30
pollution control & Environmental Management in Sugar Factories & distilleries	15
ETP Operation & maintenance	17
Special Analysis in Sugar Laboratory	8
Analysis of Water/Waste Water & Solid waste	04
Total	418

- Activity Name** : Short Term Training Programme for Officers of Maharashtra State Excise
- Activity scope** : To train the excise people of Maharashtra & VSI staff related to distillery industry processes
- Activity details** : Department of Alcohol Technology & Biofuels (AT & B), VSI conducted tailor made short term training programme from 26th June to 7th July 2023 (First lot) and from 31st July to 11th August 2023 (Second lot). The courses were inaugurated by Dr. K.S. Konde, Head, Professor & Technical Adviser, Department of AT & B. He introduced the staff of department of AT & B to the trainee participants. He elaborated the importance of the course to the participants. Both the short term courses covered topics such as Composition of molasses & its storage, Preservation and maintenance of yeast cultures, Propagation of yeast culture on industrial scale, Global and national scenario of distillery industry and potential of the country to meet the demand and supply of alcohol, Latest technologies of alcohol production from various feedstock, Various types of fermentation & distillation processes

The training was inaugurated by the Mr. BH Pawar, Training Coordinator and Senior Scientist and Head, Plant Pathology Section in presence of Heads of sections from Agriculture Sciences & Technology Division. Dr. GS Kotgire, Scientist, Plant Pathology section welcomed all the participants and others.

Modern and scientific sugarcane cultivation technology was taught during the training period which covered the lectures and practical's on various topics like sugarcane varieties and varietal planning, seed nursery management, tissue culture, modern planting techniques, weed management, soil fertility and fertilizer management, irrigation water management, use of bio-fertilizers, farm mechanization, ratoon management and integrated disease and pest management during two days training program. All the agriculture scientists conducted theory lectures

with the help of power point presentation. More emphasis on practical's and field demonstrations was given during the programme.

In the plenary session, the participants resolved their doubts from the subject experts. In the concluding function, the representative trainees expressed their satisfaction about the training, lodging and boarding facilities provided to them. Officials asked

questions about organic sugarcane agriculture and appealed to scientists to focus on it. The certificates were distributed to the trainees. Hon. Director General, VSI discussed with participants during farewell function about the difficulties faced by them in sugarcane agriculture in their area and appealed them to adopt modern technologies in sugarcane. The program concluded with Vote of thanks

Short Term Training Programme for Officers of Maharashtra State Excise

Commissioner of State Excise, Government of Maharashtra State requested VSI to arrange a short term training programme for their experienced as well as newly appointed officers.

In this regard Department of Alcohol Technology & Biofuels (AT & B), VSI conducted tailor made short term training programme from 26th June to 7th July 2023 (First lot) for the Deputy Superintendent (1 Officer) and from 31st July to 11th August 2023 (Second lot) for the Asst. Commissioner Superintendent, Probationary (1 Officer) and

Dy. Superintendent, Probationary (3 Officers), State Excise, Government of Maharashtra.

The courses were inaugurated by Dr. KS Konde, Head, Professor & Technical Adviser, Department of AT & B. He introduced the staff of department of AT & B to the trainee participants. He elaborated the importance of the course

to the participants. He also thanked the Commissioner of State Excise, Government of Maharashtra for sending the officers for the training at VSI.

Both the short term courses covered topics such as Composition of molasses & its storage, Preservation and maintenance of yeast cultures, Propagation of yeast culture on industrial scale, Global and national scenario of distillery industry and potential of the country to meet the demand and supply of alcohol, Latest technologies of alcohol production from various feedstock, Various types of fermentation & distillation processes, Operating parameters and operational efficiencies, Alcoholometry, Microbial analysis of molasses, Estimation of viable yeast count, Fuel ethanol production by molecular sieve dehydration technology, Production process of country liquor and Indian made foreign liquor (Whisky, Brandy, Rum, Gin & Vodka), Malt alcohol production, Indian standards (BIS) for alcohol, liquors, beer and wines, Concept of microbrewery, Denaturant, denatured spirit and denaturation of spirit, Records and registers to be maintained in CL & IMFL, Maturation & aging, taxes and duties on molasses and alcohol etc. The course also included important demonstrations/practicals in the training programme, which will be helpful for the

State Excise Officers while working at distilleries and liquor manufacturing units. The demonstration of alcohol estimation and sugar estimation of molasses were shown to the participants. The analytical facilities of the department were introduced to the participants. The officers were quite impressed after seeing the facilities such as GC, GC-MS, HPLC, Densitometer, FTNIR, pilot winery, nano brewery etc.

To understand the record keeping of excise molasses & alcohol and alcohol fermentation process conducted in distillery, the visit of participants was arranged to Malegaon SSK Ltd. The officers were impressed by visiting the distillery.

To understand the liquor manufacturing process conducted in liquor unit, the visit of participants was arranged to United Spirits Ltd., Pimpali, Tal. Baramati. The officers were impressed by visiting the liquor manufacturing unit.

On the occasion of the concluding session the training, certificates distributed to the officers by Dr. KS Konde. The participated officers appreciated the overall training programme organized by VSI.

Team of NRCG, Pune

A team of scientist viz., Dr. Holkar and Dr. Anupama Naik Pune from the National Research Center on Grapes (NRCG) visited Vasantdada Sugar Institute on July 10, 2023. The purpose of their visit was to inspect the infrastructure at VSI related to the production of virus-free clean planting material and the diagnosis of virus indexing & genetic fidelity and DNA Markers for fingerprinting.

During the visit, Dr. SG Dalvi and Dr. RM Devarumath briefed the NRCG team about the activities and facilities at VSI and discussed the possibility of sharing facilities and potential collaborative work.

It was observed that Vasanta Urja has demonstrated efficacy in providing abiotic stress tolerance and biotic stress tolerance, particularly in suppressing viruses in plants. Based on these observations, Dr. AD Kadlag and Dr. SG Dalvi visited NRCG Pune and held discussions with Dr. Kaushik Banerjee, Director of NRCG, Pune.

The discussions focused on extending the MOU between VSI and NRCG to include recommending the application of Vasanta Urja through research trials, with the aim of promoting residue-free and sustainable grape production.

Visit of Mr. Ravi Kumar (IAS), Managing Director of the Mysore Sugar Company

Mr. Ravi Kumar (IAS), Managing Director of the Mysore Sugar Company undertaking of Government of Karnataka has visited Vasantdada Sugar Institute on July 26-27, 2023. Mr. Sambhaji Kadupatil, Director General welcomed Mr. Ravi Kumar and briefed about R & D, Extension services, Academics & other activities of the Institute. VSI film was displayed regarding various activities. In the welcome function

all the HODs & section heads explained their various activities and R & D projects. Mr. Ravi Kumar discussed with HODs regarding various problems and remedies. He has also discussed with Mr. RA Chandgude, Head & TA (SE), Dr. RV Dani, Head & TA (ST) and Dr. KS Konde, Head, Prof. & TA (AT & Biofuels) regarding plant modernization, cogeneration & ethanol production etc.

EVENTS EVENTS

National Seed Day

Under ICAR seed project Vasantdada sugar institute had organized National Seed Day on **October 4, 2023**. On this occasion a one day training programme was organized on "Sugarcane cane seed multiplication & production technology" for cane development officer, agriculture assistants of sugar mills & seed nursery farmers.

Mr. Vikas Patil, Director, Input and Quality, Commissionerate of Agriculture, Pune, Govt. of Maharashtra was the chief guest. The workshop was inaugurated by the lighting of lamp by auspicious hands of Mr. Vikas Patil, Mr. Sambhaji Kadupatil, Director General and Dr. AD Kadlag Principal Scientist. The welcome address was given by Mr. RN Gaikwad, Scientist. Dr. AD Kadlag guided to the participants regarding importance of three tier sugarcane seed system. He mentioned that three tier seed multiplication programme is helpful for adoption of varietal and seasonal planting in the operational areas of mills. He also stressed that improved cultivation techniques are needs to be adopted for enhancing per unit cane and sugar productivity.

Mr. Sambhaji Kadupatil, in his inaugural speech mentioned that the seed is most crucial inputs in

sugarcane farming. Those mills and farmers are using same seed material year after year hence, productivity is also decline. He highlighted the role played by VSI in production of breeder's seed. He stressed upon the role of sugar mills and their contribution in the seed replacement in the state is very low (6%). It is most important to replace sugarcane seed once in three years. In view of this, institute raising breeder's seed every year on 40 ha. area for distribution to mills. Very few mills lifting seed as per their demand. Most of mills are not aware about the importance of seed. Mr. Vikas Patil in his talk highlighted the importance of inputs and quality related information of Govt. of Maharashtra guidelines to other crops.

During technical session Dr. JM Repale, Sr. Scientist, Plant Breeding section delivered the lecture on "Varietal scenario in the state, its planning and identification". Mr. RN Gaikwad, scientist, farm section on "sugarcane cane seed multiplication & seed production technology" and Dr. RA Sawant, Scientist and Head, tissue culture, on "Sugarcane seed production through tissue culture". An event was concluded with vote of thanks.

National Technology Day

Vasantdada Sugar Institute celebrated National Technology Day 2024 a day in advance on May 10, 2024 to deliberate on the marvels of innovation and progress. Dr. Santosh Mhaske, Senior Principal Scientist (F) and Professor, AcSIR at National Chemical Laboratory was invited as the chief guest on this occasion. The event was attended by the Director General, Mr. Sambhaji Kadupatil, all staff and students of the Institute. It commenced with a welcome by Dr. Deepali Nimbalkar, Head of the Department of Environmental Science, setting the tone for an engaging gathering. This was followed by lighting of the ceremonial lamp by the guest and dignitaries.

Dr. KS Konde, Head of the Department of Alcohol Technology, then introduced the chief guest for the function, Dr. Santosh Mhaske, highlighting his accomplishments in the field of technology, his work for the Pharma sector and his awards including the CIPLA-HAMIED Best Process Development Award for Rosuvastatin (Rosuvastatin belongs to a group of medicines called HMG-CoA reductase inhibitors, or statins. It works by blocking an enzyme that is needed

by the body to make cholesterol, so this reduces the amount of cholesterol in the blood) by NCL-RF, 2022-2023. Dr. Mhaske was then felicitated by the Director General.

The Director General then addressed the gathering and highlighted the role of technology in modern life and developments. He also stressed on the significance of celebrating such days.

Dr. Mhaske in his lecture, not only elucidated the essence of Technology Day but also delved into a significant historical event-the nuclear tests conducted at Pokhran. He enlightened the audience about the pivotal role of technology in the successful execution of the tests, showcasing the indomitable spirit of scientific endeavor. This served as an inspiration for the students and a poignant reminder of the monumental achievements made possible through scientific ingenuity and technological prowess.

The function ended by a vote of thanks by Ms. Jyoti Kharde, Scientist, Soil Science section.
